COVID Memes

ANTIVAXXERS: THINKS THE GOVERNMENT WANTS TO TRACK US THROUGH MICROCHIPS IN THE VACCINE

1. Was this questionable information?

This was very questionable information because it was talking about a chip being injected into us which is preposterous and not very likely because if it was actually real and people found out that would be a violation of human rights.

2. Does it help or hinder efforts to get everyone vaccinated?

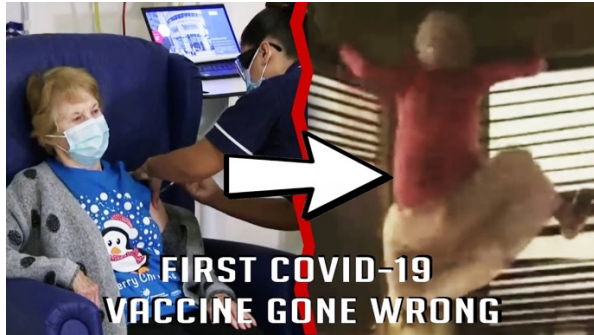

It does hinder it because people think that the government have underlying reasons to try to get people to take the vaccine and makes people not trust the vaccine even more.

3. Who is the intended audience? What clues do you have (location, image, font style, etc.)?

The intended audience are antivaxxers who don't trust the vaccine and believe that the government put a chip in it to track us

4. Who created the meme?

The mem was created by a meme page in reddit by "u/The_F0OI"

1. Was this questionable information?

The photo is very questionable because the two elderly people do look alike but since the photo on the left is real the one on the right is from a movie that is fictional.

2. Does it help or hinder efforts to get everyone vaccinated?

It does hinder efforts to get the virus because people will think they will become zombies that eat flesh if they take the vaccine

3. Who is the intended audience? What clues do you have (location, image, font style, etc.)?

The intended audience are people who have taken the vaccine or haven't and might be thinking about taking it. This was a video from the CDC where they gave the vaccine to an elderly woman.

4. Who created the meme?

The Meme was created by a youtuber called "xhashtagot5x" who has 10.8k subscriber on YouTube.

26 January

2035 " Everyone in my family is vaccinated and we are fine! "

1. Was this questionable information?

The information is questionable because people who have taken the vaccine do not change like how the meme is showing physically.

2. Does it help or hinder efforts to get everyone vaccinated?

This does hinder efforts to get people vaccinated because it makes people think that their family and they will deform and maybe their kids in the future will come out will disabilities.

3. Who is the intended audience? What clues do you have (location, image, font style, etc.)?

The intended audience are people who have taken the vaccine and anyone who has facebook that can see their posts.

4. Who created the meme?

Someone in Facebook created the meme on January 26. Name was crossed out.
